

Grade 7 Mathematics Benchmarks Coverage

Reporting Category	Benchmark	Calculator	% of Test
Number Sense and Operations and Algebraic Reasoning	MA.7.NSO.1.1	CL	25-31%
	MA.7.NSO.1.2		
	MA.7.NSO.2.1		
	MA.7.NSO.2.2		
	MA.7.NSO.2.3		
	MA.7.AR.1.2 Also Assesses MA.7.AR.1.1		
	MA.7.AR.2.1		
	MA.7.AR.2.2		
Proportional Reasoning and Relationships	MA.7.AR.3.1		22-31%
	MA.7.AR.3.3		
	MA.7.AR.4.1		
	MA.7.AR.4.2		
	MA.7.AR.4.3		
	MA.7.AR.4.4		
	MA.7.AR.4.5 Also Assesses MA.7.AR.3.2		
Geometric Reasoning	MA.7.GR.1.1		22-28%
	MA.7.GR.1.2		
	MA.7.GR.1.3		
	MA.7.GR.1.4		
	MA.7.GR.1.5		
	MA.7.GR.2.1		
	MA.7.GR.2.2		
	MA.7.GR.2.3		
Data Analysis and Probability	MA.7.DP.1.1		22-28%
	MA.7.DP.1.2		
	MA.7.DP.1.3		
	MA.7.DP.1.4		
	MA.7.DP.1.5		
	MA.7.DP.2.1		
	MA.7.DP.2.2		
	MA.7.DP.2.3		
	MA.7.DP.2.4		
Total Number of Items			36-40

CL = Calculator is available for items at benchmark

Test Length

These tables provide the approximate range for the number of items on each test.

FAST Mathematics	
Grades	Number of Items
3–5	35-40
6–8	36-40
Note: During the Spring administration, approximately 4-5 items on all of the tests listed above are experimental (field test) items and are included in the ranges above but are <u>not</u> included in students’ scores.	

B.E.S.T. EOCs	
Course	Number of Items
Algebra 1	45-50
Geometry	
Note: During the Spring administration, approximately 5 items on all of the tests listed above are experimental (field test) items and are included in the ranges above but are <u>not</u> included in students' scores.	

Grades	FAST Mathematics Administration Time
3–5	Up to 80 Minutes (PM1 and PM2)
	Up to 100 Minutes (PM3)
6–8	Up to 100 Minutes (PM1 and PM2)
	Up to 120 Minutes (PM3)

Course	B.E.S.T. EOC Administration Time
Algebra 1	160 Minutes*
Geometry	

*Students who need additional time may continue working up to the length of a typical school day.

Grades/Courses	Online Calculator
6	Four-function
7, 8	Scientific
Algebra 1	Scientific
Geometry	Scientific

FAST Mathematics and B.E.S.T. EOC Item Types

All FAST and B.E.S.T. EOC assessments are **computer-based**. The Florida B.E.S.T. Standards Assessments are composed of test items that include traditional multiple-choice items as well as enhanced items that require students to select and/or support their answers. The various enhanced item types are described below.

- **Technology-Enhanced Item Types—Mathematics**

- **Editing Task Choice**—The student clicks a drop-down menu containing options to complete an equation or expression, a statement, or other component. The student then selects the correct response from the drop-down menu. For paper-based accommodations, this item type is modified; the student fills in a bubble to indicate a selection.
- **Selectable Hot Text**—The student is directed to click on one or more correct answers from among a number of options. When the student hovers over the options (e.g., phrases, sentences, numbers, or expressions), the text will highlight. This indicates that the text is selectable (“hot”). The options may be presented in various ways (e.g., as a list, embedded within text, or in a table). The student can then click on an option to select it. For paper-based accommodations, this item type is modified; the student fills in a bubble to indicate a selection.
- **Multiselect**—The student is directed to select all the correct answers from among a number of options. These items are different from Multiple Choice items, which allow the student to select only one correct answer. These items appear in the online assessment and paper-based accommodations.
- **Graphic Response Item Display (GRID)**—The student uses the point, line, or arrow tools to create a response on a graph. The item type may also require the student to select numbers, words, phrases, or images and use the drag-and-drop feature to place them into a graphic. For paper-based accommodations, this item type will be replaced with another item type.
- **Equation Editor**—The student enters a number, variable, expression, or equation, as appropriate to the test item, in a response box. The student is presented with a toolbar that includes a variety of mathematical symbols that can be used to create a response. The response box may be separate from the text of the item, or it may be embedded within text of the item (e.g., in line with a sentence or within a table). For paper-based accommodations, this item type is modified; the student writes a response in the response box.
- **Matching Item**—The student checks a box to indicate whether information from a column header matches information from a row. The number of correct answer options per row or column may vary. These items appear in the online assessment and paper-based accommodations.

Any of the item types may be combined into a single item with multiple parts called a multi-interaction item. The student will interact with different item types within a single item. Each part could be a different item type. For paper-based accommodations, different selectable-response item types (multiple choice, multiselect, editing task choice, selectable hot text, and matching) may be combined into a single item.
