

High Yield Number Routines in a CGI Classroom

How to Talk Less and Listen More

High-yield routines are structured activities (games) that develop mathematical concepts over time. There is "low" investment of time and planning for a "high" value in returns in terms of mathematical thinking and understanding.

Activities include:

- * Which One Doesn't Belong?
 - * Today's Number
 - * Mystery Number
 - * Alike & Different
 - * Number Lines
 - * Quick Images
 - * Splat!
